

We purchased XM Radios and their service for the benefit of what they have to offer. It is a product and we like it. I don't appreciate the National Association of Broadcasters or the FCC trying to limit the product that we purchased in any way. This is not right. We value the variety and the quality and we are willing to pay for it. We are unable to get this type of programing service in our northern New York area. We love it. It's quality programing and we get to choose what we listen to. The NAB may not like it. It may threaten their jobs, but they should have done a better job in the service they provided. XM Radio is like cable TV but cable radio. We purchased this product for the quality new, talk shows, weather information they offer and the best music selection I've ever had. We respectfully ask the FCC to reject the NAB's petition 04-160. The FCC should support XM's ability to provide the kind of programing that we enjoy and deserve. We are the sponserers of this radio station. The only product we are promoting is the radio service that we purchased. Thank you for your time and we hope that satilite radio will not be limited by the NAB. Rspectfully, Kim and Steve Basford
